

CrossCert Global Internship – FIDO Market Research

Introduction

CrossCert Inc. (한국전자인증) offers a three-month internship to university students this summer. Students looking for job opportunities or internships to cover the time gap during the summer vacation can start applying now.

CrossCert is a licensed Certificate Authority licensed by the Korean Government that provides various authentication and security solutions. One of the solutions is a FIDO solution called FIDO Secure Vault (FSV). This service enables passwordless online authentication using secure FIDO technology. FSV is used in KB apps, Toss, BMW Korea, Seoul Digital University, and other companies.

Responsibilities for this position include market research for FSV and documentation of sales-related information.

Selected candidates will work in the CrossCert offices in Seocho-gu. [7~8 minutes walk from Line 3, Seoul Nat'l Education University Station]
